

Science 4-6 Syllabus

Spring 2010
Dear Parents,

I'm excited to have your child in class this semester. I have lots of fun things planned and anticipate a productive time this spring. We will be studying three scientists whose impact on science and history are immeasurable: Leonardo DaVinci, Galileo Galelei, and Isaac Newton. We will spend three weeks on each scientist and three weeks on a cumulative project that will help reinforce concepts learned throughout the semester. We will do lots of hands on activities and touch on some older science skills, such as scientific method, note taking and critical thinking.

Please feel free to contact me with any concerns or questions. I pray this class is a blessing to you as you homeschool this spring.

Sincerely,
Mrs. Mill

Newton

4th-6th Grade Science
Spring 2010

January 27th - Leonardo DaVinci- Mirror Writing & Scientific Observation

February 3rd - Leonardo DaVinci- Dissection (owl pellets)

February 10th - Leonardo DaVinci- Flight (paper airplanes)
